

### Communicating Smarter

Leveraging leading edge knowledge and technology to guide clients towards integrated IP-Based solutions providing productivity improvements and lower costs.

### Value Proposition

Looking at your communication requirements from a broad and holistic perspective to provide optimal IP-based, innovative and bias-free solutions, including wireline or wireless applications. This involves integrating networks and services with a broad knowledge of technologies, such as telecom ("BellHeads") and Internet ("NetHeads") while also leveraging various certifications and accreditations in our staff.

### 'DIS' is what we do ...

**Design, Install and Service** IP-based convergent (voice-video-data) communication solutions, for wireline and wireless networks.

#### Design

- Needs analyses
- Site surveys
- Path analyses
- Network design (LAN/WAN)
- Fail-over system and notifications
- GSM data solutions
- Remote monitoring and operating solutions
- Phone systems
- Security and alert systems
- Assessment of strategic alternatives and cost-benefit analyses

#### Install

- Project management
- Fibre optic and structured cabling deployments
- Phone systems integration
- Network and bandwidth management (QoS)
- Municipal and industrial networks

#### Service

- Equipment monitoring
- Network monitoring
- Software as a Service (SaaS)
  - VoIP
  - Email
  - Collaboration
- Trunks and least cost routing

### You Are in Need When ...

- You operate in multi and/or remote locations
- Have important partners/suppliers in distant locations
- Moving your office location and think it might be a good opportunity to upgrade the communication system
- Want to integrate remote workers (e.g. telecommuters, road warriors) into your communications system (internet, email, phone...)
- High level of security for your LAN/WAN
- Significant cellular spending
- Ability to control and monitor your cost on departmental and location bases
- Want networks and systems that will easily grow with you – "scalability"
- Do a lot of conferencing (voice or web)
- Data monitoring/gathering from remote locations
- Access to video, internet and phone for a remote location
- Integrated phone system across multiple locations
- Surveillance cameras at remote locations
- Remote monitoring of equipment (e.g. Water/ Sewage Pumps)
- Design for a wide geographical wireless system
- Conferencing (voice, video, web)
- Internet fail-over solution with notifications
- System fail-over with notification
- Secure remote access

### Management Team & Experience

*Jacques C. Bourgeois, Ph.D.*  
*Reg Ibison*

Founder and CEO  
Chief Technology Officer

The company was founded in 2004. The RARIS management team has a deep understanding of the telecommunications and IT industries, including patents and senior management positions in industry. RARIS's unique, tailored and bias-free solutions makes it a leader in its field.
